

Ice-effect resin lamp with wooden base, Italy, circa 1970

€500

REF: 7638

Height: 25 cm (9.8")

Diameter: 20 cm (7.9")

DESCRIPTION

Cylindrical table lamp composed of textured translucent resin elements, evoking ice blocks arranged in a vertical pattern.

Light diffuses through the irregular surface, creating a warm and mineral glow. It sits on a circular wooden base that contrasts with the sculptural, luminous resin.

A decorative piece typical of 1970s Italian design, where material and atmosphere played a central role.

Italy, circa 1970.
